SUMMARY

Applied AI / Product Engineer with 8+ years shipping 0→1 products across consumer crypto, fintech, and customer-embedded software. Former startup CTO and Magic Eden engineer who scaled wallet products to 250k MAUs and owned partner-facing APIs. Recently focused on LLM systems: LangGraph agents, RAG, tool-use, evals, and human-in-the-loop workflows.

EXPERIENCE

AI Product Engineer Feb 2025 - Present
Self-Employed

- Built Lykos, a LangGraph prediction-market agent with two-stage RAG, LLM-as-judge evals, human-in-the-loop review, and cited forecasts.
- Built Qurio, an AI personal-finance app using LLM tool-calling over live Plaid, Zerion, and account data for natural-language money queries.
- Built MyTummyHurts, an AI food scanner with a LLM scoring pipeline to identify gut-sensitivity triggers.

Senior Software Engineer Feb 2024 - Feb 2025
Magic Eden *remote*

- Scaled the Magic Eden Wallet (mobile and Chrome extension) to a peak of 250k MAUs across multiple chains.
- Built and owned the public partner API powering external automated trading, driving \$5m+ in annual volume.
- Translated direct user feedback from Solana, EVM and Bitcoin ecosystems into shipped product improvements.

Founding Partner Engineer Aug 2023 - Feb 2024
Carpool *remote*

- First hire: owned product direction and engineering execution, helping clients integrate with our high-performance Solana blockchain indexer.
- Drove the product to acquisition by Magic Eden within 7 months.

Co-Founder / CTO Dec 2021 - Aug 2023
Blockstop *remote*

- Co-founded a blockchain product studio; led strategy, architecture, and delivery for enterprise brand clients launching on-chain loyalty products and custom dApps
- Embedded with each client from scoping through production, owning the technical relationship end-to-end and generating \$3M+ in client revenue.

Senior Software Engineer Sep 2018 - Jan 2022
Capital One *remote*

- Designed data streaming services in Java and Python reliant on Kafka and AWS.

SKILLS

Languages TypeScript, JavaScript, Python, SQL, Solidity.
Full-Stack React, React Native, Node.js, NestJS, REST APIs, AWS, TailwindCSS.
AI & Agents LangGraph, RAG, tool-calling, MCP, LLM-as-judge evals, embeddings, reranking.
Strengths Customer-embedded delivery, 0→1 product strategy, startup execution.

EDUCATION

Bachelor of Computer Engineering, Penn State University 2014 - 2018
